Get LCA Results

Interested in life cycle assessment for a building project but not quite prepared to do it yourself? Our unsurpassed expertise is available to project teams, at very reasonable consultant rates. And when you engage us, you are also supporting our public-service work to advance the science and the practice of LCA for the built environment.

Here’s how we can help you meet your sustainability objectives:

ADD LCA TO THE DESIGN PROCESS
LCA is a powerful tool for testing and validating sustainable design measures throughout the design process. Put us on your technical team.

REPORT EMBODIED CARBON
If you’ve encountered a program or policy requiring you to measure and report embodied carbon for a building, you need LCA. Let us do it for you.

GET A THIRD-PARTY REVIEW
When an external set of expert eyes is needed, turn to us for peer review of whole-building LCA studies done by others.

EARN LCA POINTS IN GREEN BUILDING PROGRAMS
The whole-building LCA incentives in LEED®, Green Globes® and other programs are easier to achieve than you might think. We are experts in this.

PRODUCE AN ENVIRONMENTAL BUILDING DECLARATION
Join the sustainability leading edge – ask us to publish your LCA results in a transparent environmental building declaration (EBD) in conformance with the standard EN 15978.

LEARN THE IMPACT ESTIMATOR
Learn while doing - we’ll coach you through LCA on your project. You’ll get LCA results with our oversight, and you’ll be ready to do the next one on your own.

Why we need your support

The Athena Sustainable Materials Institute is a non-profit research group that advocates for environmental performance measurement and accountability in the built environment. We are the North American leader in LCA for construction and its materials and have been providing ground-breaking research and free resources since 1997.

Help us continue to provide our public service by joining the Athena Institute as a member or a donor.
